Michael Curnes

TECHNICAL EDUCATION
University of Kansas Fullstack Developer Certificate: Graduation: 12/2017

TECHNICAL SKILLS:
Node | MySQL | Express | Bootstrap | Sequelize | HTML |Handlebars |CSS

EXAMPLES OF WORK

Project Name:	**Medi-Schedule**

Hospitals often have cumbersome applications to access and view data that ends up divided between patient and staffing information. As a result, administrative officials and staff have to switch between systems and manage fragmented datasets in order to do their jobs effectively. Medi-schedule brings those together and presents data in a manageable format that allows staff to check-in patients, set their schedules and stay organized.

Technologies/ Frameworks Used:	**Node.js, Express, Sequelize, MySQL, HTML, CSS, HandleBars**
Project Name:	**Add Bit Up**

Add Bit Up is an original CLI toolbox that provides up to the minute cryptocurrency prices, calculates USD to Bitcoin conversion rates and fetches detailed snapshots of the user's account balances and portfolio allocations by interfacing directly with the Binance and Kraken APIs.

Technologies/ Frameworks Used:	**Node.js**

Web Development Skills
- Designing web applications based on user ability and needs.
- Design and build websites using a variety of languages, libraries and databases.
- Adhering to industry standard workflow practices.
- Produce content and giving guidance to team members to meet goals in an efficient manner.
- Use Object Oriented Programming to create complex multi-layered applications.

Pro-Sneaker Workshop - Creator/Owner/Operator
- Consulted hundreds of customers in selecting and maintaining cloud server workspaces based on budget and need.
- Gave guided lessons and and tutorials to educate customers in optimizing software performance.
- Acted as a liaison between customers with no technical experience and cloud platform engineers to quickly resolve performance and security concerns.
- Worked remotely with individuals in multiple time zones to solve problems and provide service at any time.
- Organized resources, formulated strategies and executed those to continuously improve and expand services provided to end users while increasing revenue.

Mass-Communication

- 2 years of journalism training under Associated Press guidelines that focused on building a solid editorial, grammatical, and written foundation to produce well executed professional and public messaging.
- Independently researched and produced editorial content under strict deadlines.
- Collaborate and communicate with team members to produce stories and content that meets deadline and quality requirements.
